WILL CUT OUT **TOBACCO CROP**

Lexington, Ky.- Declaring It to be the autention of the larger manufacturers of tobaceo in this country to buy only one half of the present crop of approximately 300,000,000 pounds lowest possible prices, and when they have secured more than one half to withdraw their buyers from the market, Congressman J. Campbell Cantrill, In a two hours 'address, delivered in the Woodland Park auditorium to approximately 2,000 growers, warehousemen, bankers and merchants representing all counties in the blue grass region, advocated a plan of procedure which, he says, represents the differ-ence between rulnation and salvation.

He urged, tirst, that the growers agree unanimously to raise no tobacco in 1921; second, that they determine not to sell any tobacco before April 15, by which time it will be too iate to one haif of the crop over the loose leaf der of her life. loors after April 1&; fourth, that they send the other half to their loose leaf warehouses In their own communities when linished marketing the first half ind have it redried and put in storage to be held under negotiable warehous eccipts until November or December lifth, that an organization for the or terly, business-like carrying out this program be perfected, and, sixth that there be no lawiessness.

Almost Ali Favor Cut-Out.

At the conclusion of the Congress nan's address, which had been most attentively received, a newspaper man tepped forward, saying that the press rould like very much to have the seument of the gathering on the queslon of a cut-out, and asked that all la favor of growing no tobaceo in 1921 Indicate by rising. The audlence t there remained sitting no more than PRICE OF CRUDE 0 out of 2,000.

Congressman Cantrill told his hearers that including the stocks in the hands of the manufacturers, which he fixed at 267,000,000 pounds, including the residue of the low grades of the 1919 crop in the hands of dealers, which he estimated to be 75,000,000 pounds, and including the present crop of 300,000,000 pounds in the hands of while crossing Pine Mountain, was like country. He slated that there has laylie Woman's Club. January i. He told them if they would raise it erop in 1921 there would be at the end of the year a surplus of 700,-000,000 pounds, which would be three ears' supply, and that for the suceeding five years, because of that suptobacca would not average more in 5 cepts per pound.

"The best thing on carth we could he sald, with much emphasis would be not to sell a pound of this shacen until next December, after aving cut out the 1921 crop."

OIL DECLINES

The fears of local oil men and citi ens have been realized. of 25 cents per barrel has been announced in the price of Somerset and Somerset light oil, affecting nii the oil produced in the Big Sandy Valicy. This brings the two grades to \$4 and \$4.25. Pennsylvania grade lost 35 cents per barrel and Corning was cul to \$3.75. Reductions in Western oil occurred me time ago.

No reason is given except the genral tendency to lower prices in all lines, tims giving the opportunity for cutting the price of oil. Production and wildcat work will slacken under this downward tendency.

READJUSTMENT HITS THE COAL INDUSTRY

Nothing would be gained by camoutlaging the readjustment which has hlt the bituminous coal industry. The blow came at a time when weekly pro-duction was right at the twelve-million-ton peak. Perhaps it would be equaliy vain to attempt to predlet how drastle the process will become before tile tide turns toward normal operations. But like the weatherman, all of us are inclined to do a little forecastlng. This is doubtless due to the mystle trait in our make-up. So ict us sum up brielly the pro and con elements just for luck:

(I) The lakes are closed, but the rallroads are still running coal to the Northwest; (2) There is a full in export shipments, but Europe is still. short, and is burning the eargoes sent overseas aboul as fast as unloaded; (3) American industries are at low ebb, Indleated by the lack of steam coal orders and by the low level of the stock markel, but wages and raw materials are coming down to a point pormitting mills and factories to resume;
(4) Public utilities, while culting the corners, must have coal to do buslness; (5) The rallroads are on the mend, having about caught up with the lessened demand for transportstion, including the movement of coalin fact loading in some mine quarters s not up to placements; (6) The ficancial condition of the country as a whole is sound, no industry being more so than coal mining, due to the money made during and since the war, thn coti in the mine remaining stock in rade without deteriorization; (7) The public has got over its buying freak. and is putting more money into the anks, as are also the merchants after lquidating their high-priced slocks by special snies. In fine, all of us-a hundred milion strong-are getting down to brass tacks, just as Eurone is trylng to do in imitation of thrifty Belgium and Czecho-Slovakla, it ooks as though the coming of the New Year will witness the passing of thogeneral crisis in this country, allhough the coal industry can hardly hope for the turn of its tide so soon, as it was the last to be hlt.

AFTER INVENTORY SALE

Starting Friday, Jan. 14, 1921

We have just finsihed our inventory and have repriced every piece of merchandise in the house to conform with present market prices regardless of former cost. We are determined to keep the volume of our sales up during the month of January and realize that to do this we must give the public extra values. Our "four store direct from factory buying power" enables us to give values regularly that cannot be equalled and these repriced items will show you distinctly that our sale means an extraordinary saving to

-GARMENTS OF THE HIGHEST TYPE -FINELY TAILORED, RICH-LY TRIMMED AND FASHIONED FROM THE MOST EXPENSIVE MA-TERIALS

Such models as these seldom take part in an event of this kind—finely fashioned and exclusive, they are usually the first to find new owners. These models were received late in the present senson which not only accounts for their presence in this sale, but for the fact that their styles are of most recent origin. The new prices represent hardly more than a small part of the former markings, and any woman can find ample reason to be enthusastic over a selection made from this excellent group.

She Has Style

If that is said of you, you may cheerfully forego any other praise, for you have the highest, the greatest compliment that can be paid a woman. It is so easy to be pretty-almost anyone with a little cleverness can be called good looking, but Style makes one woman stand out above all others in a large gathering—it makes her distinctive. OHIO FARMER, SAYS AFTER SUF-FERING SEVEN YEARS TAN-LAC HAS RESTORED

"Tantac certainly is a real medicine for only a real medicine will make a man of my age gain seventeen pounds n weight and feel as young as I do, sald John H. O Nell, a well known farmer of Darrowville, Ohio, recently

"For seven years I suffered with stomach trouble and became so badly run down and servous I could hardly inld to my plaw handles. After eating I would turn almost deathly sick ind bloat with gas until I could scarcely breathe. I had sach dizzy spells at writing times I couldn't stone over to hook a bittle Willie Holbrook, who was trace and would just stagger around

until I caught to something. "I couldn't put in a day's work with out having such terrable pains all thrumy body I could hardly endure it. It was an effort to do anything, and it seemed that the more medicine I took the worse I got.

That when I started taking Tanlac I soon felt like a new man . I have taken four lottles now and my stomach is in such true condition I am eating like a horse without suffering, and as I said, I have gained severateen pounds in weight. The pains have disapposited from my body and I can do a hard day's work and enjoy it. In fact, Tanlac loss made me feel almost as well as did at the age of twenty-five, and that's saying a lot for a man of sixty. Anyway, it is the best medicine I ever tip acto and I'll take it for mine ev-

THE BEGINNING OF A BANK-NOTE

Little Marcia's baby dress though made of the finest linen was ultimately worn threadbare. One day it landed in the rag bag and was sold to the junk dealer. When the rag sorter touched the discarded garment he detected in a flash the fine quality of the flax and set it aside for a journey to the Bureau of Engraving and Printing at Washington. Eventually it became legal tender—a bank-note. Just how is told in one of the beautiful booklets about Our Government which we are sending each month to those interested.

Just send us your name and address and you will receive a copy of every issue of the series without charge.
